SENIOR FRONTEND DEVELOPER

AMPLYFi

Who are we? What do we do?

LOOK DEEPER. SEE CLEARER. ACT SMARTER.

AMPLYFI is on a mission to transform business intelligence and research. We're bringing our expertise in artificial intelligence and deep-web technologies to modernise the stayed and clunky approaches that organisations have relied on for years. AMPLYFI's flagship platform, DataVoyant, empowers companies to make data-driven decisions based on key insights drawn from the vast wealth of information sitting within the depths of the internet.

To achieve our goal, we've assembled a team of the best and brightest, with decades of experience in machine learning, software development and business. We are ambitious, driven and absolutely committed to putting our game-changing technologies in the hands of the world's largest organisations.

We've already begun this process. We're working with some of the leading names in industries including banking, pharmaceuticals, defence, and energy – and this is only the beginning. A testament to the excitement AMPLYFI is generating among businesses is the need to hire a new frontend developer to the team. To keep our delivery at the high levels to which our clients have become accustomed, we will only hire the most talented and driven that the market has to offer.

What you'll be doing?

As a Senior Frontend Developer, you will be responsible for:

- Implementing and maintaining responsive Single Page Applications (SPAs)
- Building and supporting scalable frontend APIs
- Acquiring an understanding of our entire technology stack
- Applying best practices and suggesting improvements to products and processes where appropriate

You'll be based at our HQ in Cardiff.

Who are you?

To excel in this position, you will have:

- A number of years' experience in the joys and pain of production systems, preferably at scale
- Knowledge of a number of programming languages and frameworks, with a strong sense of the right and wrong way of engineering things
- You actively work to encourage and educate less experienced team members
- You must be a forward thinker that can bring new ideas to the table
- Have the enthusiasm and a flair for troubleshooting and problem solving
- Pride and accuracy in everything you do
- Ability to deliver to deadlines

Technologies

Stack — Amazon Web Services (AWS)

Software — Javascript, Typescript, React or Angular, Express, Node

If you think you would be a great fit at AMPLYFI, please email careers@amplyfi.com with your CV and a one paragraph overview of why you are the right person for the job.
